C. HUNTER DISTANCES. Combinations: one stride in and out, 24-26 feet; two strides in and out, 36 feet. Distances relative to height are recommended as below. Consideration should be given to adjusting only if weather conditions or arena footing (too deep, packed, too hard, or too wet) would so warrant. Safety of horse and/or rider should always be given priority.

Height	2'6"	2'9"	3'0"
Distance			
(3) strides	47' (14.35m)	47'6" (14.51m)	48' (14.63m)
